

### **REMARKS**

Claims 25-31 are pending in the application and are rejected. Claims 26-31 are herein amended. No new matter has been entered.

### **Claim Objections**

Claims 26-31 are objected to under 37 C.F.R. §1.75(c) as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicants herein overcome this objection by amending claims 26-31 to depend from claims 25 and 27, instead of claims 1 and 3. Applicants submit that the objections have been overcome.

### **Double Patenting**

Claims 25-31 are rejected under the judicially created doctrine of obviousness-type double-patenting as being unpatentable over claim 1 of commonly assigned U.S. Patent No. 6,833,887. The Examiner asserts that the claims are not patentably distinct from each other because both the present application and the claims of the cited patent disclose the same liquid crystal shutter having a twisted angle of greater than 180°, a pair of polarizing plates and a driving circuit for driving the liquid crystal shutter.

Because both the cited reference and the present application are commonly assigned, Applicants herewith file a Terminal Disclaimer, disclaiming any patent term of the present application that would extend beyond the patent term of the cited patent. Applicants submit that the rejection has been overcome.
